

FOR IMMEDIATE RELEASE

OGCA Announces: Partnership with Vubiz to Provide Educational Courses to Members

Mississauga, ON, October 15th, 2007: Vubiz and the Ontario General Contractors Association (OGCA) are pleased to announce the signing of a partnership agreement that will result in a new online education program in support of Ontario's General Contractors.

The OGCA is a strong supporter of education and personal improvement; we are original supporters of the Gold Seal initiative and today offer a variety of courses across the province. We are working to create new and update old courses to provide the best value to our members. At the same time we recognized a need for a more general line of self improvement courses that would provide value to members of the OGCA and instill a desire to take other courses. This partnership with Vubiz will help to address that need.

Our partnership with VUBIZ will enable the OGCA to offer continuing education programs to our members:

- With over 100 courses to choose from, we are sure members will find something to suit their goals;
- OGCA members are offered exclusive program pricing;
- Courses include safety courses that can be applied toward the Gold Seal seminar requirements for application.

We believe you will find these first one hundred courses of value and encourage you to participate.

Members are invited to take a tour of the site to see firsthand the commitment the OGCA has to helping our members build the skills needed to deliver construction excellence!
